---

EPA issued a joint statement with the Texas Commission on Environmental Quality about a controlled burn of materials at the Arkema facility in Crosby Texas. The Crosby Volunteer Fire Department and the Harris County Fire Marshall's Office performed the burn.

Information was provided to support preparation of a Hurricane Harvey Incident Story Map that will provide information about NPL sites, drinking water plants, wastewater plants and other pertinent information in the impacted counties.

A presentation was prepared for the Acting Regional Administrator to brief a Congressional delegation at the Houston facility on September 4, 2017.
